Most of my Tumblr Themes have the option of displaying your Instagram feed. To display the Instagram feed, first you will need to grant Embedagram permission to display your Instagram photo. Second you will need to find your Instagram id, go to <http://jelled.com/instagram/lookup-user-id> and type in your username, click submit and it will show you your id. Paste your id in the “Instagram ID” section, click save and your Instagram widget will start display your Instagram shots!
